

## Live the Dream

Imagine a job where you actually look forward to work. Lead a life others fantasize about. Sailing into incredible sunsets could be the rule not the exception. The commute to work could be as easy as a ten minute boat ride. Work becomes an adventure in itself. While experiencing new cultures and lifestyles, you'll be surrounded by people who are always happy. When you take people diving all day everyone's happy. It's not all fun and games in paradise, but the rewards are well worth the effort.

The first step is the **PADI Open Water Diver** course. This is the most widely recognized and respected rating in the world and on attaining it you have the freedom to dive with a buddy independent of a professional.

After completing five more adventure dives you achieve the **PADI Advanced Open Water Diver** rating which will give you more experience, make you feel comfortable in the water and let you enjoy your diving more.

The **Emergency First Response Primary & Secondary Care** courses are pre-requisites for the PADI Rescue Diver course but more importantly gives you basic life saving and first aid skills that could be beneficial in everyday life.

The **PADI Rescue Diver** course is both rewarding and fun. Rescue Divers learn to look beyond themselves and consider the well being and safety of others. Although serious this course is an enjoyable way to build your confidence.

The **PADI Divemaster** course is your first step on the professional ladder. Working closely with instructors you will expand your dive knowledge and hone your skills as well as developing your leadership abilities by learning to supervise dive activities and to assist instructors with student divers.

The first portion of the **PADI Instructor Development Course (IDC)** is the **PADI Assistant Instructor** course where you'll gain additional experience as a PADI professional and start to learn the PADI system of diver education.

Continuing with the IDC leads you into the **PADI Open Water Scuba Instructor** program which is your final step in the quest to become a PADI Instructor. The PADI Open Water Scuba Instructor rating earns respect from both students and peers and sets you apart from the crowd.

**PADI Instructors do things others can only dream about. If you want to live an extraordinary life, you're in the right place.**

At London School of Diving we run a number of career development programs that are tailored to suit candidate's needs. We can also tailor packages for individual's specific requirements.

To become a PADI professional you must be over 18 and reasonably proficient and comfortable in the water.
