## **DSAT Gas Blender Instructor Course**

The DSAT Gas Blender Instructor course trains candidates to conduct the DSAT Gas Blender course.

You will learn how to teach students how to be a qualified gas blender allowing them to provide gas mixes to appropriately qualified consumers. They will learn the physical properties of oxygen, it's associated hazards, handling requirements and what cleaning equipment is necessary and the different methods of obtaining the required nitrox or trimix blend.

The course consists of academic and practical sessions and is conducted at our dive centre in Chiswick over one day.

To enroll on the DSAT Gas Blender Instructor course a candidate must be a PADI Open Water Scuba Instructor or higher, a PADI Enriched Air Instructor and a DSAT Gas Blender or equivalent (We include the DSAT gas blender within the program for an extra £30 if required)

The course costs £199 and includes the Gas Blender Instructor manual, student manual and the digital DSAT Gas Mix Calculator.

Not included is your application to DSAT which is currently £30.55.
